

Counting 1-100

What do I need?

- Print this on a cardstock.
- Get a "chess" piece or any small character piece that will represent the player.
- Make sure to prepare a dice for a random number pick.
- Invite a friend to play with. This can be played by 2-4 friends.

How to play?

- Each player will put their chess/character piece on box number 1. Each player will take turns in rolling the die.
- Move the chess/character piece depending on the count given by the die.
- If the piece lands at an empty box, the player must fill it with the correct number.
- If the piece lands at the bottom of a ladder the chess piece will move up.
- If the piece lands at the head of a snake the piece should move down.
- The first player to move on or beyond box 100 wins.
